

## Criminalise Nuclear War Systems conference

*A series of quarterly week-long  
Conferences*

**In Saga House Undīne, Dubulti,  
Jūrmala, Latvia.**

**Initial meetings: June 1-7<sup>th</sup>  
2015**

International Foundation for Research on Radioactivity Risk, [www.IFRRR.org](http://www.IFRRR.org), proudly presents the conferences organized by Environmental Research SIA in Latvia.

The goal of the conference Criminalize Nuclear War Systems is to establish a platform for a global network of scientists marking the current systems that have brought us to the Nuclear War risk and suggesting safe systems.

Strategy is to avoid research that is at the services of military and industrial corporate businesses and present radically honest work by independent scientists spreading their findings.

Methods of the conference are to present crucial research in written and video format easily available to any viewer on IT without any cost. The program offers a restful, knowledgeable and spiritually fulfilling week focusing on the solutions eliminating possibility of Nuclear War (NW).

Participants are targeted among the strategic leaders of state, regional and local institutions. The fee varies. Welcome!

"Using simple mirror systems we can replace oil, coal and nuclear power with solar energy at a competitive price. To do this, we do not have to go to the desert, the system I propose works in Germany as well. The establishment could have developed such mirror systems thirty or fifty years ago; they didn't do it, and they are now doing everything in their power to prevent others from developing them," says Grassmann, and he adds, "It is possible to avoid the wars over oil, to end the production of nuclear waste and to stop global warming. There would be no extra cost. All we have to do is grant freedom of thought, not just in

politics but in science as well. ... Fanatics and extremists benefit from the money we pay for oil. We even finance their development of atom bombs. At the same time we kill the minds of our young scientists, who could show us the way out of this insanity. How stupid and immoral can we get?"
